

OPTIONS FOR EVERYONE. FROM ANYWHERE.

Weir Orthopaedics has been delivering high-quality, personalized joint replacements to patients from all over North America since 1987. Our Private Patient Program is designed for patients regardless of their insurance situation.

A flat fee covers your initial consultation. Surgery is performed for a single fee and covers all the professional fees from Weir Orthopaedics for a year. We can even help you submit your claim to your insurance for reimbursement for any costs you might have.

HOW IT WORKS:

Initial consultation:

A flat fee covers your exam, x-rays and appointment with the doctor. He will discuss what is going on with your joint and the options for getting better.

Insurance:

Some insurance companies allow you to submit a claim directly to them to be reimbursed. We can help you submit the claim if your insurance allows it.

Surgery:

A single surgical fee covers the surgery and all care delivered by Dr. Weir for the following year. This includes post-operative visits, x-rays, examinations and in rare cases any revision surgery.

Other information:

The facility where your surgery is performed will bill your insurance directly for hosting the surgery. There may be additional charges from the facility if you have not met your deductible or have a co-pay.

Please contact us and ask to speak to the Private Patient Program manager for more information.

A NOTE FOR OUR OUT OF TOWN PATIENTS:

We know traveling for joint surgery is a big commitment to getting the best care. Our staff is ready to help you and your family with accommodations during your stay whether you are from across the state or across the country. Please contact us for more information.
